# Website Structure

Information Architecture

For this website design we will use wireframing, using horizontal bar near the top of the page taking up the right two thirds of the page.

1) Navigation Bar:- Contains Home, Tours, National Parks, Maps, Photo Gallery & Contact
2) Main photo of Table Mounting with intro duction to website.
3) Sample of Tours that were taken during the trip.
4) National Parks that are recommended to visit and active external links.
5) Drop down list of Maps to choose from.
6) Maps of South Africa and National parks that also includes the Tip of South Africa where the Indian Sea meets the Atlantic Ocean.
7) Photo Gallery
8) User experience story of trip.
9) Contact Form

Interaction Design (UXD)

The user will be brought back to the home page by clicking on the 'Home' icon on the navigation bar or by clicking on the 'Top' button that is located on the bottom right hand side of the page after the user scrolls past anything greater than 20 px from the top of the screen.

Each item in the navigation bar heading will be highlighted once selected to confirm that clicking that area has an action.

On mobile devices the hamburger icon will not be used as some users may not know what it does. If selected it will stay present once each selection is pressed.
